## *Microcement system for inside and outside*

**Masters Micro Concrete** is a microcement system with just two millimeters of thickness suitable for both inside and outside. It is a finishing with very resistant and impermeable concrete base.

It opens your rooms by creating elegant, modern and continuous surfaces without visible joints. It is the ideal solution for both horizontal and vertical surfaces, such as floors, masonry walls, stairs, kitchen countertops, bathrooms, furniture, patios...

Thanks to its strong adhesion, Masters Micro Concrete can be applied on a wide range of supports: plaster, wood, concrete and even glass and ceramic. It allows you to renew existing surfaces on different bases (tiles...) without having to remove them, avoiding tedious demolition works.

The look is entirely customized. You can choose from a range of 43 colors and multiple effects. It is possible to achieve a glossy, satin or matte finish. The only limit is your imagination!

**Masters Micro Concrete**  
Component A - Powder  
4kg - 10kg - 20kg

**Masters Micro Concrete**  
Component B - Binder  
500mL - 1L - 2L - 5L

All our products are tested and validated regularly by independent laboratories and are in compliance with the standard.
